

ImVec2

```
graph BT; ImRect -- "Min  
Max" --> ImVec2;
```

The diagram illustrates a relationship between two classes, ImVec2 and ImRect. ImVec2 is represented by a white rectangular box at the top, while ImRect is a gray rectangular box at the bottom. A dashed purple arrow points from ImRect up to ImVec2, indicating inheritance. The arrow is labeled with 'Min' and 'Max' stacked vertically, representing the data members being inherited.
